ABOUT OUR SINK

Our kitchen sink are made by SUS304 stainless steel material. Stainless steel is the most common form of stainless steel used worldwide, largely due to its excellent corrosion resistance and value.

It can withstand corrosion from most oxidizing acids (rust). This durability makes stainless steel easy to sanitize, making it an ideal material for our kitchen sink.

The numbers 304 indicate the material toughness, while SUS signifies that the stainless steel adheres to the Japanese Standard.

WATERFALL SINK
